

Abandoned Children's Fund's Mission

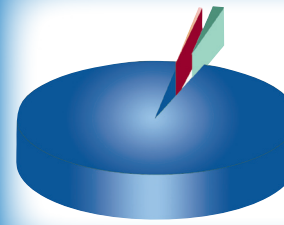

is to provide for innocent orphans; cruelly abandoned, alone, hungry, desperate and terrified victims of disease, war and extreme poverty.

We devote our time and effort to love, house, feed, educate, and restore abandoned children's futures through children's homes that are sanctuaries of love, laughter and hope; and to deliver medicine and medical supplies to clinics and hospitals serving the poorest of the poor.

In 2015,
more than
\$10,500,000
in aid, medicine and
programs* were delivered
to poor children and
families by Abandoned
Children's Fund.

Reclaiming Our World's Lost Children

2015 Annual Report

Haiti

In June of 2015, we partnered with a caring group of missionaries and volunteers to ship and provide **over 270,000 meals** for abandoned children in Haiti! Many of the children that we support live in rural mountain villages that are completely cut off from the outside world and *have no idea when or where their next meal will come from.* Our team prides itself on seeking out those children who often have no other source of hope for life-saving relief goods such as medicine and food.

Zambia

In Zambia we help provide support for a lifesaving clinic which specializes in caring for abandoned babies. Many times the babies are near death when they reach our partner's door. Fortunately, these babies are now getting the specialized treatments they need to survive.

Kenya

Our project partners in Kenya operate an orphanage that was first opened in 2001 to care for AIDS orphans. At that time there was only one small classroom with 13 children. Today the center has grown to an orphanage that provides care for more than 75 abandoned children. These children receive the loving warmth of a household complete with food, medical care, clothing, education and most importantly tender loving care. Many of these children have worked hard to receive scholarships for higher education.

Ghana

Every year ACF donors make it possible for us to provide emergency feeding programs in a neglected refugee camp, home to over 10,000 Liberian women, **abandoned** children and victims of extreme poverty. Unable to obtain employment as victims of war, they must try to survive in appalling poverty. The food we send helps these abandoned families while they struggle to survive.

Uganda

Our Ugandan project focuses on rescuing **abandoned** children from the misery of living alone on the streets of Kampala. These children have been **abandoned** with no other place to go. With your support we have helped build a loving home where 87 children live with our caring staff and enjoy the love of a family and an invaluable education!

Philippines

Tragically Asia has one of the largest sexual trafficking problems in the world. **Many children are sold or kidnapped into slavery.** For some there is hope after they are able to escape from captivity. However, the transition back to a normal child life is anything but easy. That's where ACF and our partners come in. Together we are helping to provide not only shelter and food for innocent victims, but also an education and therapeutic programs that can help them return to a normal life over time. With time, these children regain their joy and happiness, it's a transformation that is **priceless.**

Honduras

ACF is proud to partner with local government officials, hospitals, clinics and doctors to send urgently needed medication to care for children in need. The hospitals and clinics which receive and distribute ACF donated medicine, provide care for the poor and needy **free of charge!** Enabling countless children to receive necessary medical attention which they may otherwise not receive!

Mexico

With our long existing partner in Mexico, ACF is helping care for over 100 children who have been neglected by their families in one of the most dangerous cities in the world. *Just like an answer to prayer these beautiful, young and innocent children were delivered to Emmanuel orphanage, a place of protection, healing and even, an education.*

Jason, age 9, would like to thank the ACF donors for "providing me a home where I am loved and taken care of. I am so thankful to have a bed, a blanket and warm meals every day. Thank you!"

Medical Donations

One of the most effective and cost-efficient ways we are able to provide care for suffering people in underprivileged nations is to donate and ship desperately needed medicines and medical supplies to qualified health care professionals at our program sites around the globe.

Each year our ACF donors enable us to deliver millions of dollars' worth of donated medicine! In the year 2015, we were so thankful to be able to continue this practice and ship more than \$10,000,000 in donated medicines and medical supplies for the poor and needy. The outpour of thanks we receive from our partners and from recipients of these medicines, demonstrates the great nature of this kind of support.

These medical shipments to "third world" communities are a vital complement to our children's homes, schools, and feeding programs as they provide highly needed medical care to children who otherwise might not have the opportunity to seek medical attention when they are ill!
