

Abandoned Children's Fund's Mission

is to provide for innocent orphans; cruelly abandoned, alone, hungry, desperate and terrified victims of disease, war and extreme poverty.

In 2017,
more than
\$5,000,000

in aid, medicine and
programs* were delivered
to poor children and
families by Abandoned
Children's Fund.

Medical Donations

One of the most effective and cost-efficient ways we are able to provide care for suffering people in poor nations is to donate desperately needed medicines and medical supplies to qualified health care professionals.

In 2017, we were so thankful to be able to ship more than **\$5,000,000** in donated medicines and medical supplies. The outpour of thanks we receive from our partners and from recipients of these medicines, demonstrates the great nature of this kind of support.

These medical shipments are a vital complement to our children's homes, schools, and feeding programs as they provide highly needed medical care to families who otherwise might not have the opportunity to seek medical attention when they are ill!

Children's Fund®

2017 Annual Report

Haiti

In Haiti our partners have worked to build a rural health clinic which serves tens of thousands of children and families. Everyday infants and children are brought to the clinic where the volunteers and nurses treat them for severe malnutrition and several other illnesses common in Haiti. In 2017, we also partnered with a caring group of missionaries and volunteers to ship over 295,000 meals for abandoned children in Haiti.

Mexico

With the help of our donors, ACF and our partners are able to provide care for over 100 children who have been neglected by their families in one of the most dangerous cities in the world. *Just like an answer to prayer these innocent children were brought to a place of protection, healing and even, an education.*

Ghana

Every year ACF donors make it possible for us to provide emergency feeding programs in a neglected refugee camp. The camp is home to over 42,000 people, most of whom are women and children. The funds we send help these abandoned families while they struggle to survive years of war and starvation.

Zambia

In 2017 Abandoned Children's Fund partnered with a wonderful project to support Zambian children ages birth-6 years old. The children receive 24 hour care with nurses trained in assisting children suffering from grief, trauma and loss. Without the support from ACF, these children would be at an increased risk of being abandoned on the streets of Zambia. We are happy to report almost half of the children rescued, have been returned to their loving family or adopted into their new forever family.

Uganda

Our Ugandan project's focus is to give children a loving home, daily meals and an education for a better future. Children of Kampala, Uganda are often abandoned with no family to care for them; left to rummage for scraps of food just to stay alive. Our mission is to help keep them off the mean streets of Uganda. This past year we have helped fund the building and maintenance of Vocation Schools. These schools provide meals, clean drinking water and much needed safety. The children also gain knowledge and life skills to keep them off the streets, and away from a life of crime.

Somalia

Somalia has been victim to an intense drought due to multiple seasons of little rainfall. The lack of rain and water has wiped out their crops and killed their livestock. In 2017 we were able to help supply nutritious food desperately needed for the children of Somalia.

Philippines

In the Philippines a uniform is required for the children to attend school. Abandoned Children's Fund was able to sponsor many children so they have the opportunity to continue their education. Our hope is to give these children the foundation for a bright future.

Kenya

Our partners in Kenya focus on providing clean drinking water, education and medicines for children and families of all ages. Unsafe water is a leading cause of disease and death. Over 50% of patients hospitalized are suffering from water related illnesses that may be fatal. We will be continuing our support to help provide clean water and education to the children in Kenya.
